Coloured Ceramic Knives

Coloured Ceramic Knives

- Super sharp
- Patented ceramic technology
- Soft grip handles

Zirconia ceramic blades are super sharp and stay that way for longer! They will not corrode, and in use will prevent the discolouration and tainting of food. The patented technology used in the manufacture of our ceramic knives ensures that the zirconia blade core is extremely compact and strong. This helps to give the blade a longer life and superior flexural strength.

taylor's
eye witness since 1838

Taylor's Eye Witness was founded by John Taylor in the early part of the 19th Century. They have stood the test of time through an unrelenting dedication to quality, service and good old fashioned technical know-how in the design and production of kitchen knives and scissors. What they don't know about knives isn't worth knowing!
